LOK SAINADH KESANA

United States | +1 857-381-1827 | kesanaloksainadh@gmail.com | LinkedIn | GitHub

EDUCATION

Northeastern University | Boston, MA Jan 2025 – Dec 2026 (Expected)
Master of Science in Information Systems GPA: 3.78/4.0

Mahindra University | Hyderabad, India 2020 – 2024
Bachelor of Technology in Electronics and Computer Engineering

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, PHP, HTML, CSS
Web & Software Engineering: React, FastAPI, Next.js, Node.js, REST APIs, API Development, System Design, Prisma
Data: MySQL, SQLite, MongoDB, pandas, NumPy, scikit-learn, ETL, Data Modeling
Tools: Git (Version Control), GitHub, Docker, AWS S3, Apache Airflow, Claude API, Streamlit, Plotly

PROFESSIONAL EXPERIENCE

Software Engineer (Level 1) | Power Mech Projects Limited Aug 2023 – Dec 2024
Hyderabad, India

- Developed and maintained a WordPress careers product processing an estimated 500+ applications monthly using PHP, JavaScript, jQuery, HTML, and CSS; integrated navigation links, breadcrumbs, and company branding.
- Built responsive front-end user interfaces for mobile, tablet, and desktop; configured required-field, email, phone, and message validation with clear submission success and failure feedback.
- Validated uploads for 3 resume formats (PDF, DOC, DOCX) with size limits and spam protection; automated delivery of candidate details and attachments to HR through SMTP integration.
- Translated business requirements with HR and a 3-person software engineering team into form fields, routing, layout, and copy; trained users on careers-page operations and application handling.
- Resolved software development issues by debugging code and implementing HR change requests; performed staging testing, maintained plugins, and optimized banner images and SEO metadata.

Data Analyst Intern | SR Constructions May 2022 – Aug 2022
Hyderabad, India

- Analyzed an estimated 50+ customer inquiries weekly and translated requirements into concise business summaries, helping the owner prioritize prospects and make follow-up decisions.

PROJECTS

Pipeline – AI Job Application Tracker (GitHub | Live Demo)
Next.js, TypeScript, Node.js, Prisma, SQLite, Claude API, dnd-kit, Tailwind CSS

- Owned software development and deployment of a full-stack product using React.js, Next.js, and Node.js; built a Kanban board with persistent application stages in Prisma and SQLite.
- Designed server-side API development and integration with Claude API to generate 4 resources from a job URL or description: cover letters, resume bullets, interview questions, and company briefs.
- Secured Claude API credentials on the server and built a responsive Tailwind CSS interface with dnd-kit to organize applications through interactive stage changes.

Stock Market ETL & Forecasting Pipeline
Python, Apache Airflow, AWS S3, MySQL, Docker, scikit-learn, Streamlit, Plotly

- Partnered with teammates to build data infrastructure for 172 stock symbols, integrating live Alpha Vantage data and AWS S3 historical records with scheduled Airflow workflows and retries.
- Applied system design to create a MySQL star schema with 1 fact table, 2 dimension tables, and 1 reporting view for market analysis.
- Validated 42,000+ market-data rows through 7 automated quality checks and idempotent upserts, achieving zero duplicate rows across repeatable pipeline runs.
- Collaborated with teammates on time-series forecasting and a Streamlit/Plotly dashboard, translating historical market data into visual price trends and forecasts.
